

Healing and Recovery

These holistic lectures were first presented to a variety of recovery organizations and clinicians from diverse backgrounds. The emphasis is on recovery in its fullest sense—mental, physical, psychological and spiritual. To heal means to make whole, in contrast to treating, which is limited and short-sighted. The author draws from a diverse clinical background of over 50 years as a leader in the field of psychiatry. This, and his own spiritual evolution, led to a series of over eight books on the subject of human consciousness itself. Our society lives with constant stress, anxiety, fear, pain, depression, worry and addiction. This book is a dedication to the relief of human suffering in its various expressions. To truly heal is to make whole on all levels.
